

The go-to fellowship program for a career in sustainability

Join the network of energy and sustainability professionals and spend a summer working to advance climate solutions in high-impact organizations around the world. Since 2008, Climate Corps has placed over 1,400 fellows in leading private and public sector organizations including including City of Seattle, AirBNB, CAVA, Etsy, and Goldman Sachs. As a Climate Corps fellow, you will:

- be custom-matched with a host organization based on your location, industry and project type preferences;
- spend 10-12 weeks designing tools and recommendations to accomplish emissions reduction goals;
- participate in an interactive training and have access to ongoing professional development opportunities and mentorship.

Where we work

Climate Commitments

Conducting analysis and building strategies for emissions reductions in operations and supply chains.

Food & Agriculture

Reducing food waste and determining greenhouse gas reduction opportunities in animal agriculture.

Renewables and Energy Efficiency

Identifying opportunities for renewable energy and energy efficiency.

Zero Emission Vehicles

Building roadmaps for the electrification of fleets.

Fellow Spotlight

Jess Newman- 2015

As a Climate Corps fellow, Jess helped the NYC Mayor's Office of Sustainability advance Mayor de Blasio's goal of reducing NYC's greenhouse gas emissions 80 percent by 2050. Now the Senior Director of Agriculture & Sustainability at McCain Foods, Jess leads a team responsible for the strategy and execution of McCain's 2025 & 2030 sustainability goals for regenerative agriculture, water use efficiency, carbon intensity and supporting rural livelihoods.

Karan Shetty- 2019 & 2020

As a 2019 Climate Corps fellow, Karan worked with GAF Materials to perform a solar feasibility study for their manufacturing sites and a materials life cycle analysis to inform supply chain decision making. In 2020 he worked with Blue Shield of California on supplier engagement for scope 3 emissions reductions, environmental justice and employee engagement on sustainability. Now a Clean Energy Transition Analyst at PSE Healthy Energy he performs research and analysis on clean energy and environmental justice.
