

Resilient Animal Agriculture and Climate Corps®

EDF is launching our first-ever cohort of Climate Corps® fellows focused on Animal Agriculture. This is an exciting opportunity for a limited number of fellows in 2023 to work on designing and exciting sustainable agriculture strategies that can significantly reduce GHG emissions.

An impactful fellowship:

- Fellows will advance animal agriculture emission reduction initiatives and accelerate implementation of high-impact solutions in leading companies.
- Participating fellows will receive customized training from EDF experts on the environmental impacts of animal agriculture as well as best-in-class solutions to ensure they are well-equipped to support participating host companies.

We are looking for graduate students with skills in data analysis, communication, business acumen, and an interest in sustainable agriculture.

Reduce animal agriculture emissions by participating as a Climate Corps® Animal Agriculture Fellow this summer!

Application deadlines:

November 29, 2022 and
January 10, 2023

For more information, visit:

edfclimatecorps.org

As a Climate Corps® fellow, you will have the opportunity to assist with projects including Scope 3 emission inventories and reduction tracking, alignment with SBT FLAG guidance, stakeholder engagement, identifying best practices for emission reduction, and developing roadmaps for solution implementation.
